ABOUT ME

Passionate front-end developer skilled in building dynamic, responsive web applications. Experienced with React, JavaScript, and modern web tools. Continuously learning and pushing the boundaries of the web.

PROJECTS

🛍️ Ecommerce Website
Built with React , React-Router - Swiper js - Context API and reducers, with so many functionalities, fetching api, search etc.

🎬 Movie Discovery Platform
Built with vanilla js & APIs to fetch, search, display and add to favorite movies with responsive UI.

🌤️ Weather App
Uses two APIs to suggest cities and display real-time weather data.

📝 Advanced Todo App
Custom-built with Vanilla JS: reminders, drag & drop, check, delete, edit, dark/light mode (responsive).

🧩 UI Components
Divider nav menu and Swiper-based image sliders.

🧑‍💼 Portfolio

More projects on my github.

EDUCATION

University of Mohaghegh Ardabili, Ardabil — *computer science (17.46 / 20) (2 times TA , one time RA - researcher in DS & ML lab)*

NOV 2020 - SEP 2024

RESEARCHS

An overview of the architecture and categories of attention mechanisms and their applications
